

## **Dolven Architecture Associates, Architects and Planners**

Fred Dolven is President of Dolven Architectural Associates. He heads the firm's administration, marketing and design. He has been a principal in the firm since 1973 after rejoining the firm in 1971. Fred's philosophy toward design is to provide a personalized, close communication with the clients; listening intently to client needs and feeding the information back in a clearly worded program document. Fred focuses on designing functional, practical facilities that meet the needs of clients while at the same time are interesting, creative, and enjoyable to work or live in.

Fred has worked extensively with the Washoe County School District, the Regional Transportation Commission, the Nevada Department of Transportation and the Airport Authority of Washoe County.

Fred has been Project Principal on many of the firm's major projects including Phases III and IV of Truckee Meadows Community College, the Sparks City Hall Addition, the Nevada Department of Transportation Headquarters Fourth Floor remodel, and the Terminal Expansion of Reno/Tahoe International Airport (and various remodel projects subsequently).
